Summary

Java Full Stack Developer with experience in creating web applications using Java, React, Bootstrap, and MySQL. Familiar with front-end and back-end development, as well as Git and GitHub for version control. I am passionate about clean code and problem-solving, eager to contribute to software projects and grow within a dynamic team.

Skill

Frontend : HTML, CSS, Bootstrap, JavaScript, ReactJS.

Backend : Core Java, Spring-boot.

Database : MySQL.

Tools : GIT, Github, eclipse, VS Code.

Familiar With : Python.

Projects

Gym Membership System - MySQL

[Github link](#) 

- Designed a normalized MySQL database with 7+ tables for managing members, trainers, payments, and attendance.
- Implemented 50+ SQL queries using CRUD, joins, subqueries, views, and aggregate functions.
- Created stored procedures and triggers to automate tasks and ensure data accuracy.
- Generated reports using views and group-based queries for insights like revenue and active members.
- Inserted 100+ sample records and documented the entire project with SQL scripts and a GitHub README.

Education

Besant Technologies - Chennai

2025- Present

Java Full Stack Course

Mahendra Institute of Technology ,Namakkal

2021 – 2025

BE.Electrical and Electronics Engineering

- CGPA: 7.8

Certifications

IBM: Introduction to HTML, CSS, JavaScript
